

## Press Release

# VELOX adds extremely flexible high solids styrene acrylic dispersion to its adhesives range

Hamburg, 19. November 2018.

**VELOX GmbH, Europe's leading solution provider for the plastics, composites, additives, rubber, paints and coatings industries, offers a new multipurpose styrene acrylic dispersion from its supplier KEMİTEKS Kimya Sanayi Ve Tic. A.Ş. Developed for adhesive tapes applications and itself tacky coatings, the Kemiline SS 333 has excellent flexibility and tack suitable for multiple applications in adhesives and construction chemistry.**

Kemiteks has added additional capacities for up to 90.000 tons per year to increase its export activities in Europe and increased the depth of its portfolio significantly. Kemiline SS 333, one of the newly developed products, is a 60% solids styrene acrylic dispersion with a glass transition temperature of -46°C and a minimum film forming temperature of -10°C. Despite its high solids content, the viscosity is very low at 600 cps.

“Kemiteks, which is a privately owned Turkish manufacturer founded in 1993, has many years of experience in polymer dispersion production and has been a valued supplier to VELOX,” says Marten Reimers, Product Manager, VELOX. “Their investment in additional production capacity is a proof of Kemiteks’ commitment to providing the highest-quality products to the industry. The new Kemiline SS 333 provides excellent flexibility and tackiness with easy processibility – a unique combination that I know our customers will find many applications for.”

The dispersion can be supplied in drums, IBCs or flextanks. Typical applications include construction chemicals and adhesives. For more information about the new Kemiline SS 333 from Kemiteks please contact us.

### **About VELOX GmbH:**

VELOX GmbH is a leading pan-European distributor of raw material specialities and solutions provider for the plastics, composites, additives, rubber, paints and coatings industries.

Founded in 1993, VELOX is headquartered in Hamburg, Germany. The company has 21 offices throughout Europe and employs over 230 experienced employees to support its customers across Europe and beyond. As of September 2018, VELOX is an IMCD company.
