Functional fillers

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Calcium carbonate		GCC White Rock Minerals	Tailor-made calcium carbonate with excellent chemical purity (>99%), low iron content (Fe ₂ O ₃ < 100ppm) and very good colour value (L 97,5) for a large number of industrial applications as e.g. paints and coatings, plastics, paper, adhesives and sealants as well as for the glass and construction industry
Carbon fibre	ZOLTEK™ PX 35	ZOLTEK	Chopped and milled carbon fibres
Glass beads (hollow and solid)	Spherichel® Spheriglass® Q-Cel®	Potters Europe	Full range of hollow and solid glass beads for polymer modification, improvements of dimensional stability, weight reduction, increased stiffness and improved flow as well as enhanced surface characteristics
Mineral fillers		Minerals I Derivats	Mineral fillers: talc, china clay, mica, barites and wollastonite

Pigments

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Aluminium pigments		Carlfors Bruk	Aluminium pigments available as pastes, pellets, dedusted powders and powders; Plastics: Metallic / silver pigments
Titanium dioxide Rutil & Anatase	Various types	Various	Grades for paints and coatings, construction materials, adhesives and sealants and rubber compounds

Specialities in Motion

Flame retardants

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Flame retardant Halogen free	NOFIA™	FRX Polymers Inc.	Polymeric phosphor-based flame retardants for PC, PC/ABS, TPU, polyester, unsaturated polyester and epoxy resins as well as polyurethane. NOFIA™ homo- and copolymers as well as oligomers provide complete transparency, toughness, a high melt flow and achieve a very high limiting oxygen index; all the types are halogen free
Flame retardant Masterbatch	VEMAB® FR	VELOX	Tailor-made flame retardant masterbatches for injection moulding and extrusion of PP, PE, PS and ABS
Flame retardant Synergist	ADINS® Clay ADINS® Fireproof	TOLSA Group	Organically and inorganically modified high purity ultrafine sepiolite, a natural occurring needle-like silicate. Designed to enhance char layer properties and decrease heat and smoke release. Product is available on request in different coated versions
Flame retardant Synergist	DICUMENE	SI Group	Eco-friendly flame retardant synergist for substitution of antimony-trioxide in halogenated flame retardant systems for PP, PE, PS, EPS and HiPS

Plastic additives

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Antimicrobial	IONPURE	Ishizuka	Antimicrobial additive based on a glass matrix with silver ions
Antimicrobial	LIFE™	Life Material Technologies Limited	Broad range of organic and inorganic antimicrobial additives in powder, liquid and masterbatch form
Antioxidants	RIANOX	Rianlon	A complete range of phenolic, aminic, sulphur-based and multi-functional AO used during processing and to extend life cycle of plastic products
Chain extender	Fine-Blend®	Fine-Blend	Chain extender for recycling of PC, PA and PET
CNT	GRAPHISTRENGTH®	Arkema	Multi-wall carbon nanotubes for antistatic and electrically conductive applications; masterbatches for thermoplastics, epoxy and elastomer applications available
Compatibiliser	Fine-Blend®	Fine-Blend	Compatibiliser for PC/ABS, PBT/ABS, Styrenics etc. Coupling agents for GF-filled
Conductive additives	avanSTATIC TPU avanSTATIC PVC avanSTATIC PU	Avanzare Innovacion Tecnologica S.L.	Conductive additives for PU, TPU and PVC applications, enabling coloured compounds
Coupling agents	BONDYRAM®	Polyram	Coupling agents for PP, PE, WPC, LFT compounds
Flow improver	Fine-Blend®	Fine-Blend	Flow improver for ABS, ABS/PC, highly filled ABS
Impact modifier	BONDYRAM®	Polyram	Impact modifiers for PA
Impact modifier	Fine-Blend®	Fine-Blend	Impact modifier for PC/ABS, PBT

Plastic additives

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Light stabiliser	RIASORB	Rianlon	HALS and UV-absorber to improve polymer's resistance to light and to protect e.g. food and cosmetic in containers
Lubricants	STRUKTOL®	Struktol Company of America	Unique processing aids for highly filled compounds and wood composites, as well as PVC
Lubricants	WARADUR®	Völpker	Montan waxes as slip, nucleating and dispersion agent for thermoplastic polymers
SBS	TUFPRENE™	Asahi Kasei	Impact modifier and compatibiliser for polystyrene
SEBS	TUFTEC™	Asahi Kasei	SEBS, SBBS and MAH-g-SEBS for polymer modification, compatibilisation and adhesives applications
