Functional fillers

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Carbon fibre	ZOLTEK™ PX35	ZOLTEK	Chopped and milled carbon fibres
Mineral fillers		Minerals I Derivats	Mineral fillers: talc, china clay, mica, barites and wollastonite
Calcium carbonate		GCC White Rock Minerals	Tailor-made calcium carbonate with excellent chemical purity (>99%), low iron content (Fe ₂ O ₃ < 100ppm) and very good colour value (L 97,5) for a large number of industrial applications as e.g. paints and coatings, plastics, paper, adhesives and sealants as well as for the glass and construction industry

Pigments

PRODUCT	PRODUCER	PRODUCT DESCRIPTION
Titanium dioxide	Various	White pigments for various plastic applications

Specialities in Motion

Flame retardants

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Flame retardant	Potassium Perfluorobutane Sulfonate (KFBS)	Time Chemical Co.	As a flame retardant additive for PC, KFBS is a thermally high stable and effective material. The addition of approx. 0,1% can achieve flame resistance class V0
Flame retardant Halogen free	NOFIA™	FRX Polymers Inc.	Polymeric phosphor-based flame retardants for PC, PC/ABS, TPU, polyester, unsaturated polyester and epoxy resins as well as polyurethane. NOFIA™ homo- and copolymers as well as oligomers provide complete transparency, toughness, a high melt flow and achieve a very high limiting oxygen index. All the types are halogen free
Flame retardant Halogen free	MELAGARD MASTERET PHOSLITE	Italmatch Chemicals S.p.A.	Halogen free flame retardants based on red and white phosphorus as well as melamine
Flame retardant Masterbatch	VEMAB® FR	VELOX	Tailormade flame retardant masterbatches for mainly Polyolefin applications. Individual solutions can be offered upon request
Flame retardant Synergist	DICUMENE	SI Group	Eco-friendly flame retardant synergist for substitution of SB2O3 and halogenated flame retardants in PP, PE, PS, EPS and HIPS
Flame retardant Synergist	ADINS® Clay ADINS® Fireproof	TOLSA Group	Organically and inorganically modified high purity ultrafine sepiolite, a natural occurring needle-like silicate. Designed to enhance char layer properties and decrease heat and smoke release. Product is available on request in different coated versions

Specialities in Motion

Plastic additives

PRODUCT	BRAND NAME	PRODUCER	PRODUCT DESCRIPTION
Antimicrobial	IONPURE	Ishizuka	Antimicrobial additive based on a glass matrix with silver ions
Antimicrobial	LIFE™	Life Material Technologies Limited	Broad range of organic and inorganic antimicrobial additives in powder, liquid and masterbatch form
CNT	GRAPHISTRENGTH®	Arkema	Multi-wall carbon nanotubes for antistatic and electrically conductive applications; masterbatches for thermoplastics, epoxy and elastomer applications available
Chain extender	Fine-Blend®	Fine-Blend	Chain extender for recycling of PC, PA and PET
Compatibiliser	Fine-Blend®	Fine-Blend	Compatibiliser for PC/ABS, PBT/ABS, Styrenics, coupling agent for GF-filled compounds
Conductive additives	avanSTATIC TPU avanSTATIC PVC avanSTATIC PU	Avanzare Innovacion Tecnologica S.L.	Conductive additives for PU, TPU and PVC applications, enabling coloured compounds
Coupling agent	BONDYRAM®	Polyram	Coupling agents for PP, PE, WPC, LGT compounds
Impact modifier	BONDYRAM®	Polyram	Impact modifiers for PA
Lubricant	STRUKTOL®	Struktol Company of America	Unique processing aids for highly filled compounds and wood composites, as well as PVC
SBS	TUFPRENE™	Asahi Kasei	Impact modifier and compatibiliser for polystyrene
SEBS	TUFTEC™	Asahi Kasei	SEBS, SBBS and MAH-g-SEBS for polymer modification, compatibilisation and adhesives applications
