Specialities in Motion

Raw materials for Paints, Coatings, Adhesives and Construction Materials:

Pigments & Fillers

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Calcium carbonate		GCC White Rock Minerals, Germany	Tailor-made calcium carbonate with excellent chemical purity (>99%), low iron content (Fe ₂ O ₃ < 100ppm) and very good colour value (L 97,5) for a large number of industrial applications as e.g. paints and coatings, plastics, paper, adhesives and sealants as well as for the glass and construction industry
Titanium dioxide Rutil & Anatase	Various types	Various	Grades for paints and coatings, construction materials, adhesives and sealants
Organic pigments		Proquimac	Wide portfolio of organic and inorganic colour pigments for paints, coatings, inks and plastics as well as pigment dispersions and dyes for nearly all applications
Silica		Konasil	Hydrophilic fumed silica for paints and coatings, construction chemicals as well as composites

Specialities in Motion

Binders & Polyols

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Co-polyester resin, saturated	SKYBON ES	SK Chemicals, Korea	Solvent-borne thermoplastic polyester resin. Showing good transparency and superior formability, outstanding adhesive strength on metal and various substrates; Applications: binder for can & coil coating, binder for inks, industrial adhesives, adhesives for flexible packaging, adhesives for stamping foil
	SKYBON EH		Hot-melt type polyester; 100% non-volatile thermoplastic resin without containing any water or organic solvent. Wide range of heat resistance, superior chemical resistance, good adhesive strength on fabric, metal and paper; Applications: automotive air-, fuel- and oil filters, label & emblem, web adhesives, spangle and fusible interlining, adhesive for metal and plastic, toe lasting, seam sealing for can
	SKYBON EW		Water-soluble thermoplastic resin; Good adhesive performance, amine/ammonia free, stable pH/viscosity, environmentally-friendly; Applications: water-based paper coating, clear varnish, vehicle or binder for water-based ink, water-based adhesive modifier for aqueous dispersed resin, etc.; readily dispersible in water, non-dispersible in ionic environments
	SKYBON EM		Thermoplastic saturated copolyester emulsion for waterborne applications; excellent water resistance by significantly reducing the polar groups in molecular structure, fast drying properties and outstanding adhesion strength on various substrates

Specialities in Motion

Binders & Polyols

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Polycarbonate polyols, Copolymer types	DURANOL™	Asahi Kasei, Japan	Suitable for PU-dispersions, synthetic leather, TPU, adhesives, paints & coatings; PU made from DURANOL™ show excellent properties compared to standard polyols (such as Polyester polyols, Polyether polyols, PTMG, PHA, Polycaprolactones) with regard to <ul style="list-style-type: none">• Abrasion resistance• Chemical resistance• Low and high temperature properties• Hydrolysis resistance and weather stability• Flexibility• Soft touch effect• Good mechanical properties
Polymer emulsions	KEMILINE®	KEMITEKS, Turkey	Broad range of dispersions and emulsions based on styrene acrylics, pure acrylics, vinyl acrylics, PVA and vinyl acetates for paints, coatings and construction chemicals

Specialities in Motion

Additives & Semifinished products

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Nano aluminium oxide dispersions	NANOARC®	Nanophase, USA	Nano aluminium oxide for surface coatings and films providing long-term scratch resistance; particularly useful for improving resistance to scratches while maintaining excellent transparency
Nano zinc oxide dispersions	NANOARC®	Nanophase, USA	Nano zinc oxide providing long-term protection from harmful UV radiation in harsh environments; full spectrum of UV absorption to improve stability of coated substrates, long-term protection due to non-migration and photostability of zinc oxide
Photocatalytic additives	ADINS® Clean	TOLSA Group, Spain	Sepiolite based additive with photocatalytic self-cleaning properties designed to be used in different systems such as mortars, cement, ceramics, glazes, paints and coatings; the ADINS Clean additive is available in powder or liquid form (previously dispersed in a water-base solution)

Specialities in Motion

Additives

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Sepiolite flame retardant synergist	ADINS[®] Clay ADINS[®] Fireproof	TOLSA Group, Spain	Organically and inorganically modified high purity ultrafine sepiolite, a natural occurring needle-like silicate; designed to enhance char layer properties and decrease heat and smoke release; product is available with various coatings
Flame retardants Halogen free	NOFIA[™]	FRX Polymers Inc.	Polymeric phosphor-based flame retardants for PC, PC/ABS, TPU, polyester, unsaturated polyester and epoxy resins as well as polyurethane. NOFIA [™] homo- and copolymers as well as oligomers provide complete transparency, toughness, a high melt flow and achieve a very high limiting oxygen index; all the types are halogen free
Carbon fibre	ZOLTEK[™] PX 35	ZOLTEK	Chopped and milled carbon fibres
Antimicrobial additive	IONPURE	Ishizuka Glass, Japan	Antimicrobial additive based on a glass matrix with silver ions

Specialities in Motion

Raw materials for Rubber:

Additives

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Accelerators	DENAX®	Draslovka a.s., Czech Republic	DPG is available in powder, powder coated and granular form
Antioxidants	DUSANTOX®	Duslo a.s.	Staining antioxidants with and without ozone resistant properties (IPPD, 6PPD, ODP, A, CDPA)
Anti-reversion additive	VUCHTALINK	Duslo a.s.	Anti-reversion additive
Retardants	DUSLIN®	Duslo a.s.	PVI, pre-vulcanization inhibitor
Sulfenamide- accelerators	SULFENAX® CBS SULFENAX® TBBS	Istrochem	Due to long scorch time combined with a fast curing speed sulfenamide accelerators leading to a safe processing
Titanium dioxide Rutil & Anatase	Various types	Various	Grades for paints and coatings, construction materials, adhesives and sealants and rubber compounds

Specialities in Motion

Additives

PRODUCT	BRAND NAME	SUPPLIER	PRODUCT DESCRIPTION
Flame retardant	DUHOR[®]	Duslo a.s.	Magnesium hydroxide
Zinc oxide		U.S. Zinc	A broad range of grades, including powder, pellets, granules, surface treatments, USP and a variety of surface areas available; customised grades, blends and packaging on offer
